

# University Council

## Information Technology Committee Annual Report May 1, 2017 – August 31, 2018

### Current Goals:

(Submitted to UC in September 2017)

Goal/Metric	Accomplished	In Progress	Not Accomplished
Explore and investigate the consolidation of email accounts to a single platform.	x		
Explore issues involving identity management and draft suggestions for IT and HR with the overall goal being a UA written document defining electronic access to the variety of campus systems.		x	
Explore issues regarding network space/storage, including the relationship with UA’s official retention policy, and draft recommended guidelines.		x	

What were your top two successes?

1. We recommended changes in the network space/storage on campus, which has resulted in changes, including the ongoing decommissioning of ZipSpace and migration of departmental file servers to new virtual servers.

What were your top two challenges?

1. We found it difficult to proceed with Goal #2 because the Lead Information Security Analyst position was not filled for much of the academic year.

2. There were many uncertainties related to decisions about email accounts and network space related to the long-drawn-out negotiations associated with the renewal of the university’s Microsoft licensing agreement.

Please list the dates of your meetings:

September 7, 2017  
September 29, 2017  
November 14, 2017  
December 8, 2017

January 19, 2018  
February 9, 2018  
March 16, 2018
